aiPHeed forecast timeline, 2025-Q1 to 2027-Q1 (E27)

Record SHA-256: fbe9121fe77a0bf5237513f494bb4517fc4ab9c8e399061e0e80bb7dbd423520
EVIDENCE: No forecast is validated. On the examined 2021-2026 quarters no model beats every baseline (persistence, calibrated persistence, always-HIGH, climatology, the Chapter I baselines), and no sealed forecast has an authorized outcome yet (0 unseen quarters scored). Every probability below is an experimental estimate.
Accuracy above 75% is not evidence of skill here: on these high-hunger quarters a rule that always says HIGH scores 0.925 at lead 1.
The score is a constructed composite of regional SWS hunger and provincial relative food inflation. It is NOT a measured food-insecurity rate.
Layers: regional_risk: measured regional SWS hunger and its forecast (one value per quarter); price_pressure: CONSTRUCTED provincial relative food-price indicator; not food insecurity; local: no measured local (municipal) food-insecurity outcome is authorized; municipal rankings reweight the province figure and are not local assessments

Q1 2025 - BACKTEST (development evidence: outcomes examined before E25)

Regional layer (SWS Balance Luzon hunger, measured): 24.0

Province	P(above threshold)	80% S1 interval	Lead	Evidence	Approved label (measured)	Price pressure P(D>0) [constructed]
Cavite	71%	[9.7, 22.05]	1	EXPERIMENTAL	HIGH	19%
Laguna	86%	[12.28, 24.63]	1	EXPERIMENTAL	HIGH	50%
Quezon	97%	[16.46, 28.81]	1	EXPERIMENTAL	HIGH	98%
Rizal	77%	[10.56, 22.91]	1	EXPERIMENTAL	HIGH	21%
Batangas	78%	[10.78, 23.12]	1	EXPERIMENTAL	HIGH	33%

Q2 2025 - BACKTEST (development evidence: outcomes examined before E25)

Regional layer (SWS Balance Luzon hunger, measured): DISPUTED: supplementary round(s) only; no label under the approved reading A

Province	P(above threshold)	80% S1 interval	Lead	Evidence	Approved label (measured)	Price pressure P(D>0) [constructed]
Cavite	no forecast	-	-	-	no label	30%
Laguna	no forecast	-	-	-	no label	27%
Quezon	no forecast	-	-	-	no label	100%
Rizal	no forecast	-	-	-	no label	15%

Batangas	no forecast	-	-	-	no label	13%

Q3 2025 - BACKTEST (development evidence: outcomes examined before E25)

Regional layer (SWS Balance Luzon hunger, measured): DISPUTED: supplementary round(s) only; no label under the approved reading A

Province	P(above threshold)	80% S1 interval	Lead	Evidence	Approved label (measured)	Price pressure P(D>0) [constructed]
Cavite	no forecast	-	-	-	no label	36%
Laguna	no forecast	-	-	-	no label	81%
Quezon	no forecast	-	-	-	no label	85%
Rizal	no forecast	-	-	-	no label	14%
Batangas	no forecast	-	-	-	no label	32%

Q4 2025 - BACKTEST (development evidence: outcomes examined before E25)

Regional layer (SWS Balance Luzon hunger, measured): 16.7

Province	P(above threshold)	80% S1 interval	Lead	Evidence	Approved label (measured)	Price pressure P(D>0) [constructed]
Cavite	94%	[15.82, 30.53]	1	EXPERIMENTAL	HIGH	57%
Laguna	98%	[18.34, 33.05]	1	EXPERIMENTAL	HIGH	66%
Quezon	97%	[17.97, 32.68]	1	EXPERIMENTAL	HIGH	55%
Rizal	90%	[14.04, 28.75]	1	EXPERIMENTAL	HIGH	29%
Batangas	95%	[16.15, 30.86]	1	EXPERIMENTAL	LOW	43%

Q1 2026 - BACKTEST (development evidence: outcomes examined before E25)

Regional layer (SWS Balance Luzon hunger, measured): 22.4

Province	P(above threshold)	80% S1 interval	Lead	Evidence	Approved label (measured)	Price pressure P(D>0) [constructed]
Cavite	95%	[16.56, 32.6]	1	EXPERIMENTAL	HIGH	60%
Laguna	95%	[16.45, 32.49]	1	EXPERIMENTAL	HIGH	77%

Quezon	94%	[15.86, 31.91]	1	EXPERIMENTAL	HIGH	44%
Rizal	92%	[15.06, 31.11]	1	EXPERIMENTAL	HIGH	53%
Batangas	92%	[15.06, 31.11]	1	EXPERIMENTAL	HIGH	18%

Q2 2026 - BACKTEST (development evidence: outcomes examined before E25)

Regional layer (SWS Balance Luzon hunger, measured): 17.3

Province	P(above threshold)	80% S1 interval	Lead	Evidence	Approved label (measured)	Price pressure P(D>0) [constructed]
Cavite	75%	[11.2, 24.71]	1	EXPERIMENTAL	HIGH	59%
Laguna	81%	[12.14, 25.65]	1	EXPERIMENTAL	HIGH	70%
Quezon	71%	[10.45, 23.95]	1	EXPERIMENTAL	HIGH	40%
Rizal	71%	[10.48, 23.99]	1	EXPERIMENTAL	HIGH	54%
Batangas	58%	[8.61, 22.11]	1	EXPERIMENTAL	LOW	28%

Q3 2026 - SEALED FORECAST, OUTCOME PENDING

Regional layer (SWS Balance Luzon hunger, measured): PROTECTED: not authorized; never opened

Q1 2027 - OPERATIONAL FORECAST

Regional layer (SWS Balance Luzon hunger, measured): None
Status: INSUFFICIENT_DATA - no operational forecast. Information cutoff 2026-12-31T23:59:59+08:00. Missing dependencies:
- [context only] 2026-Q4 news articles (October-December 2026) with original publication times (MISSING; supplier: aiPHeed news fetchers; researcher authorizes; normal release: continuous; complete at the cutoff)
- [BLOCKING] SWS Balance Luzon production round for 2026-Q3 (September 2026) with its publication date (STALE; supplier: researcher authorizes; source SWS; normal release: 2021-2025 Q3 rounds were published 17 October - 6 December of the same year)
- [BLOCKING] S1 labels through 2026-Q3 (needs the 2026-Q3 SWS round and July-September 2026 provincial CPI) (STALE; supplier: derived by aiPHeed once both inputs are authorized; normal release: after both inputs are published)
- [BLOCKING] provincial food CPI YoY, July-September 2026, with PSA release dates (STALE; supplier: researcher authorizes; source PSA; normal release: PSA monthly CPI is released in the first week of the following month (September 2026 -> early October 2026))
- [context only] provincial food CPI YoY, October-November 2026 (price-pressure indicator only) (STALE; supplier: researcher authorizes; source PSA; normal release: November 2026 CPI -> early December 2026)
- [BLOCKING] the information cutoff 2026-12-31T23:59:59+08:00 (Asia/Manila) to pass (NOT_REACHED; supplier: time; normal release: 2026-12-31T23:59:59+08:00)
Sealed earlier-information estimates (EXPERIMENTAL; not the operational forecast):

Province	Experimental estimate P(above threshold)	80% S1 interval	Information to	Lead
Cavite	72%	[10.76, 26.35]	2026-09-30	2
Laguna	70%	[10.34, 25.93]	2026-09-30	2
Quezon	72%	[10.83, 26.42]	2026-09-30	2
Rizal	71%	[10.54, 26.13]	2026-09-30	2
Batangas	61%	[8.97, 24.56]	2026-09-30	2

Official anchor (face validity only)

PSA subsistence incidence among the population (official income-based FOOD POVERTY; not FIES food insecurity). face validity only: 5 provinces and province CVs of 17-62% cannot validate a forecast.

Province	2021 %	2021 CV	2023 %	2023 CV
