aiPHeed quarterly forecast report — DA Region IV-A (development copy)

Forecast target: Q1 2027 (January–March 2027)

Supporting news: Q4 2026 (October–December 2026)

Information cutoff: 2026-12-31T23:59:59+08:00 (Asia/Manila)

Status: **INSUFFICIENT_DATA**

No forecast has been produced for this period. Missing or blocking items:

- news_reference_quarter: MISSING (no registered source)

- government_indicators: STALE (features_fused: STALE)

- provincial_food_cpi: STALE (provincial_food_cpi_2026H1: STALE)

- sws_hunger_latest_round: STALE (sws_hunger_production: STALE)

- promoted_model: MISSING (no registered source)

- cutoff 2026-12-31T23:59:59+08:00 not yet reached at run time; the reference quarter's news is incomplete

Eligible supporting articles (Q4 2026 (October–December 2026)): 0. Province-quarters with fewer than five articles are flagged LIMITED_SIGNAL.

Back-test evaluation (primary target: training-window median threshold)

Lead	Origins	HIGH/LOW	Evaluable	Proposed acc	Persistence acc	Proposed AUC	Proposed Brier
1	8	37/3	no	0.825	0.875	0.703	0.142
2	7	33/2	no	0.886	0.829	0.106	0.113
3	5	23/2	no	0.800	0.840	0.500	0.136
4	3	13/2	no	0.867	0.867	0.827	0.110
5	3	14/1	no	0.933	0.933	0.143	0.099
6	2	9/1	no	0.900	0.900	0.611	0.092
7	0	-	no	-	-	-	-
8	0	-	no	-	-	-	-

Maximum reliable lead time: none.

Null hypotheses

H1: not testable — no evaluable lead

H2: not testable — 0 evaluable lead(s); the rule needs >= 2

H3: not testable — no evaluable lead

H4: awaiting participant data — requires DA Region IV-A evaluator responses

H5: awaiting participant data — requires DA Region IV-A evaluator responses

Municipal and city rankings

UNAVAILABLE for 2027-Q1. Shown in the dashboard as a back-test example only: 2026-Q1 (BACKTEST, origin 2026-01-01). 126 of 142 LGUs use a province-mean poverty value (no LGU-specific PSA estimate); their within-province order reflects population density only.

Face-validity anchor

DOST-FNRI 2023 NNS: CALABARZON moderate-to-severe household food insecurity 19.1% (95% CI 17.0–21.1), lowest of 17 regions; national 31.4%. Descriptive regional anchor only; one regional value cannot validate provincial forecasts.

Relative ordinal risk estimates; not official food insecurity classifications.

Generated from forecast record f0c270879f395756… and E23 run 20261013T152113Z.
