aiPHeed quarterly forecast report - DA Region IV-A (development copy)

Forecast target: Q1 2027 (January-March 2027)

Supporting news: Q4 2026 (October-December 2026)

Information cutoff: 2026-12-31T23:59:59+08:00 (Asia/Manila)

LIVE

Status: INSUFFICIENT_DATA - no forecast is shown for this period.

- missing: sws_rounds: STALE (sws_rounds_verified: STALE)

- missing: label_history: STALE (s1_labels: STALE)

- missing: provincial_D_quarterly: STALE (d_quarterly_panel: STALE)

- missing: provincial_D_now: STALE (dnow_panel: STALE)

- missing: cutoff 2026-12-31T23:59:59+08:00 not yet reached at run time; the reference quarter's news is incomplete

- news_reference_quarter: MISSING (no registered source) - display context only, not used by the model

Validation evidence

Approved target, lead 1 (development quarters: 8, HIGH 37 / LOW 3): PCF accuracy 0.900, persistence 0.875, always-HIGH 0.925. Forecasting goal met: NO.

Criterion	Result
C1_accuracy_gt_75	met
C2_beats_strongest	not met
C3_not_HIGH_dominance	met
C4_defensible_across_folds	met
C5_info_beyond_persistence	met
C6_reliability_rule	not met
C9_generalizes_unseen	NOT ASSESSABLE on class C (development); see the prospective seal

Provincial price-pressure component, back-cast on 94 unseen quarters (1997-2020), lead 1: nowcast model accuracy 0.713 vs persistence 0.617; Brier 0.186 vs calibrated persistence 0.240. Reliable lead (E23 rule): up to 5 quarters; stricter rule: up to 2.

Prospective sealed forecasts (outcomes protected; scored only after authorization)

Limitations

- Development copy. Nothing here is deployed or published.

- Forecasts are model estimates of the approved composite label (regional SWS hunger + 2 x provincial relative food inflation); they are not measured or official food-insecurity status.

- 126 of 142 LGUs have no PSA municipal poverty estimate in the authorized data; their order within the province reflects population density only.

- Among the LGUs that do have municipal estimates, density and poverty move in opposite directions, so a high density-driven rank does not indicate higher poverty.

- The provincial price-pressure indicator is validated on 1997-2020 back-cast quarters; the approved composite forecast is not yet validated on unseen quarters.

Generated from record 80313f553f3a84ab, back-cast BX_20261013T163710Z, development run DEV_20261013T222827Z.
